

**MIDDLECREEK TOWNSHIP  
STORMWATER MANAGEMENT APPLICATION/PERMIT**

<b>1. APPLICATION NO.</b>		<b>2. PARCEL ID:</b>	
<b>3. APPLICANT INFORMATION</b>		<b>4. OWNER INFORMATION (if different than applicant)</b>	
Name:		Name:	
Title:		Title:	
Address:		Address:	
Phone:		Phone:	
E-Mail (if available):		E-Mail (if available):	
<b>5. LOCATION OF PROPOSED DEVELOPMENT</b>			
<b>6. DESCRIPTION OF PROPOSED DEVELOPMENT (ATTACH A SKETCH WITH DIMENSIONS)</b>			
<b>7. SITE INFORMATION</b>			
Area of Soil Disturbance (acres):			
Soil classification and types (if known):			
Total Parcel Size (acres):			
New Impervious Area (square feet):			
Total Impervious Area for Site (square feet):			
Minimum distance between the proposed impervious area and/or stormwater controls/structure discharge point to the down slope property line (feet):			
<p><b>8. UNDER PENALTY OF INTENTIONAL MISREPRESENTATION AND/OR PERJURY, I declare that I have examined and/or made this application and it is true and correct to the best of my knowledge and belief. I agree to construct said improvement in compliance with all provisions of the applicable ordinances. I realize that the information that I have affirmed hereon forms a basis for the issuance of the stormwater management permit(s) herein applied for and approval of plans in connection therewith shall not be construed to permit any construction upon said premises or use thereof in violation of any provision of any applicable ordinance or to excuse the owner or his successors in title from complying therewith.</b></p>			
_____ <b>Signature of Applicant</b>		_____ <b>Signature of Owner</b>	
_____ <b>Date</b>		_____ <b>Date</b>

<b>TOWNSHIP USE ONLY</b>			
Is this project exempted under Section 302 in the Stormwater Ordinance?	Y	N	
Does this project qualify as a small project?	Y	N	If no, a SWM Site Plan and Certification is required for approval.
<b>Refer to Infiltration Limitation Map. At or near the proposed development:</b>			
Are there fragipan soils?	Y	N	If yes, a potential infiltration limitation exists (Case 2).
Is there limestone geology?	Y	N	If yes, a potential infiltration limitation exists (Case 2).
Are there hydrologic soil group D soils?	Y	N	If yes, a potential infiltration limitation exists (Case 2).
Are there any documented problem areas?	Y	N	If yes, additional detail should be provided by applicant to ensure existing problem areas are not exacerbated by the proposed development.
Is this a Case 1 or Case 2 Simplified Method?	1	2	The certification of a qualified professional is required for Case 2 (see following page for additional explanation).

If the proposed development has regulated activities less than 1 acre and there is no required design of stormwater storage facilities by the proposed development, it may be desirable to use of the Simplified Design Method as described in the Middlecreek Stormwater Ordinance, Section 303. The purpose of the Simplified Design Method is to limit the design costs associated with small developments. Please reference the Pennsylvania Stormwater Best Management Practices Manual (December 2006) for design options. A copy is available at the Township Office. BMPs 6.4.4 – 6.4.10 are some options that may be used to satisfy the requirements of the Simplified Design Method (Chapter 6, pages 41-122).

Because there is a variety of topography within Middlecreek Township (soils, geology, existing stormwater problem areas), it may or may not be appropriate to apply the Simplified Method without the help of a qualified professional. The following two cases apply when it is desired by the applicant to use the Simplified Method. **Middlecreek Township assumes no responsibility for any work performed without the assistance of a qualified professional.**

**Case 1. If the township approves use of the Simplified Design Method, the following statement should be provided by the applicant along with design calculations and drawings that prove compliance with the ordinance:**

I, \_\_\_\_\_, do hereby certify to the best of my knowledge, information, and belief, that the information contained in this application for the

\_\_\_\_\_  
**[Name of Development]**

is true and correct, and has been prepared in accordance and is in conformance with the Stormwater Management Ordinance for Middlecreek Township. I have ensured that any potential stormwater-related hazards on the proposed development or adjacent properties have been adequately mitigated.

**Applicant Signature/Date:**

**Case 2. If the township finds there are potential limitations to infiltration at the project site, design calculations and certification are required —at applicant’s costs— from a Qualified Professional with the following statement:**

I, \_\_\_\_\_, do hereby certify to the best of my knowledge, information, and belief, that the information contained in the accompanying plans, specifications, and reports for the

\_\_\_\_\_  
**[Name of Development]**

has been prepared in accordance with accepted engineering practice, is true and correct, and is in conformance with the Stormwater Management Ordinance for Middlecreek Township. I acknowledge that there is a potential restriction to infiltration on this site and that this restriction has been carefully considered and any hazardsto the proposed development or adjacent properties have been adequately mitigated.

**Professional Certification**

**Case 3. If the regulated activities of the proposed activity are greater than 1 acre, the Simplified Method may not be used.**
